Excel VBA, Advanced Excel Formulas, Excel Templates, VBS Script, Batch File, PowerShell, File Watcher & Folder Path Automation Dashboard and Reporting Power BI, Microsoft Lists, SharePoint Data Sources, Data Cleaning, RFQ Dashboard, Job Order Dashboard, Field Service Dashboard, Data Visualization.

Web Development and Database:

React, Vite, TypeScript, Supabase, GitHub, Vercel, PostgreSQL Basics

WORK EXPERIENCE

IT Specialist

Watts App Industrial Sales Corp.

September 2025 – Present

IT Support and Infrastructure

- Provided technical support for company users involving hardware, software, printers, CCTV systems, and network-related issues.
- Installed, configured, and maintained desktop computers, peripherals, and office equipment.
- Performed troubleshooting for network connectivity issues involving IP configuration, DNS, internet access, and shared network resources.
- Assisted users remotely using tools such as AnyDesk and Veyon for faster issue resolution and user support.
- Supported basic server and VPN-related tasks using Unraid and Tailscale.
- Conducted preventive maintenance and system checks to ensure smooth daily IT operations.
- Assisted in organizing and maintaining company file systems and shared server folders.

Automation and Process Improvement

- Developed Excel VBA tools to automate requisition preparation and job order-related document processing.
- Built an automatic sticker generation system used for QC/QA panelboard sticker preparation.
- Used Excel VBA, VBS Script, Batch File, and PowerShell to automate file handling, folder monitoring, and repetitive office processes.
- Created folder path automation to save generated files into organized server locations.
- Improved manual workflows by converting repetitive tasks into structured and easier-to-manage systems.

Microsoft 365 Workflow Automation

- Created Power Automate workflows connected to Microsoft Teams, SharePoint Lists, and Excel.
- Built workflows that convert Microsoft Teams channel posts into structured SharePoint List records.
- Developed automated due date reminders for job order and task follow-up.
- Created file sorting automation for uploaded PDF and Excel files in SharePoint/Teams folders.
- Built automatic Teams notification workflows using SharePoint List triggers and adaptive card-style messages.
- Integrated Microsoft Teams, SharePoint, and Excel to reduce duplicate encoding and manual follow-ups.

Dashboard and Reporting

- Built Power BI dashboards for RFQ and quotation tracking, job order monitoring, and field service reporting.
- Connected Power BI reports to Microsoft Lists and SharePoint data sources.
- Created visual reports for operational tracking, including statuses, due dates, overdue items, project activity, and service history.
- Improved reporting visibility by converting list-based data into organized dashboard views.

Internal Web Application Development

- Developed an HR Attendance System using React, Vite, TypeScript, Supabase, and Vercel.
- Built features for attendance records, late records, absences, exemptions, and undertime monitoring.
- Used Supabase as the backend for storing and managing attendance-related records.
- Designed the system to centralize HR attendance monitoring and reduce manual checking.

Consultant
House of Representatives of the Philippines
February 2025 – June 2025

- Coordinated with multiple government agencies to support public service-related processes.
- Assisted in preparing reports and organizing information for public service tasks.
- Supported citizen assistance and government program coordination.
- Contributed to documentation and data organization for operational reporting.

Technical Support / Helpdesk Intern
CDO Foodsphere Inc.
September 2024 – January 2025

- Resolved daily technical issues related to computer hardware, software, and user support.
- Assisted in troubleshooting system and device issues for end users.
- Created user manuals and documentation to improve onboarding and troubleshooting efficiency.
- Supported IT inventory documentation and system process tracking.

PROJECTS

HR Attendance System

- Developed a web-based attendance monitoring system using React, Vite, TypeScript, Supabase, and Vercel.
- Built features for attendance records, late records, absences, exemptions, and undertime tracking.
- Helped centralize HR attendance monitoring and reduce manual checking.

Power Automate Workflow Automation

- Created 10 Power Automate workflows for Microsoft Teams, SharePoint Lists, Excel, file sorting, reminders, and automatic notifications.
- Automated Teams channel posts into structured SharePoint List records.
- Built scheduled due date reminder flows for operational follow-up.
- Created file sorting flows for organizing uploaded PDF and Excel files.

Power BI Dashboards

- Built Power BI dashboards for RFQ/Quotation tracking, Job Order monitoring, and Field Service reporting.
- Used Microsoft Lists and SharePoint as data sources.
- Improved visibility of operational status, deadlines, overdue items, and service history.

Excel VBA and Macro Systems

- Developed a Requisition Automation System that generates item summaries, requisition summaries, accessory summaries, and requisition slips.
- Built an Automatic Sticker Generator for QC/QA panelboard sticker preparation.
- Used Excel VBA, formulas, VBS Script, Batch File, and PowerShell folder watching.

Copilot Studio RFQ Status Assistant Bot

- Built a Copilot Studio chatbot connected to SharePoint List data.
- Allowed users to search by RFQ number or company name.
- Returned RFQ status, action, source, and related folder information through chat.

EDUCATION

Bachelor of Science in Information Technology

Colegio de San Gabriel Arcangel, Inc.
2021 – 2025

Humanities and Social Sciences

Dr. Carlos Lanting Sr. College
2019 – 2021
